3D MODELING, ANIMATION, VISUAL EFFECTS, GAME DESIGN & PROGRAMMING

ROBERT STEFANSON

FACULTY

Robert arrives at LCV with over twenty years of experience working in Higher Education. Of those years, he has spent the last seven years as Campus Director of both Nimbus School of Recording & Media, as well as Red Academy. Robert graduated from The Centre for Digital Imaging & Sound in 2001 with a Diploma in Recording Arts. He spent 7 years working at Armoury Studios as a recording engineer, where he had the opportunity to work on productions for independent and major label artists from around the world. He also was Head Engineer for the 2010 Winter Olympics Opening and Closing ceremony which was broadcast to 50 million viewers around the world. At that same time, he started teaching Audio Engineering and Music Production at Nimbus School of Recording & Media where he progressed to the Head Instructor role, managing all academic staff and curriculum development.

When asked about his experience and philosophy, he states that, "As a Program Director, I love seeing the transformation that takes place for those on their student journey. I have taught and facilitated learning, designed curricula, managed instructional staff and subject matter experts, run the daily operations of schools, and overseen the student experience. My greatest joy is working with people, students, and faculty alike, as well as listening with an open ear to learn, understand, and provide clarity and direction with empathy and integrity."
